

Supporting young people online

Information and advice for parents and carers

The internet – an inspiring and positive place

The internet is an amazing resource which enables children and young people to connect, communicate and be creative in a number of different ways, on a range of devices. However, the internet is always changing, and being able to keep up to date with your children's use of technology can be a challenge. You may sometimes feel that your child has better technical skills than you do, however children and young people still need advice and protection when it comes to managing their lives online. Issues that your child may encounter on the internet will vary depending on their age and online activities. We have grouped potential online risks into these 4 categories.

Conduct:  Children need to be aware of the impact that their online activity can have on both themselves and other people, and the digital footprint that they create on the internet. It's easy to feel anonymous online and it's important that children are aware of who is able to view, and potentially share, the information that they may have posted. When using the internet, it's important to keep personal information safe and not share it with strangers. Encourage your child to be respectful and responsible when communicating with others online, and to consider how what they share may reflect on them. Discuss with your child the importance of reporting inappropriate conversations, messages, images and behaviours and how this can be done.

Content:  Some online content is not suitable for children and may be hurtful or harmful. This is true for content accessed and viewed via social networks, online games, blogs and websites. It's important for children to consider the reliability of online material and be aware that it might not be true or written with a bias. Children may need your help as they begin to assess content in this way. There can be legal consequences for using or downloading copyrighted content, without seeking the author's permission.

Contact:  It is important for children to realise that new friends made online may not be who they say they are and that once a friend is added to an online account, you may be sharing your personal information with them. Regularly reviewing friends lists and removing unwanted contacts is a useful step. Privacy settings online may also allow you to customise the information that each friend is able to access. If you have concerns that your child is, or has been, the subject of inappropriate sexual contact or approach by another person, it's vital that you report it to the police via the Child Exploitation and Online Protection Centre (www.ceop.police.uk). If your child is bullied online, this can also be reported online and offline. Reinforce with your child the importance of telling a trusted adult straight away if someone is bullying them or making them feel uncomfortable, or if one of their friends is being bullied online.

Commercialism:  Young people's privacy and enjoyment online can sometimes be affected by advertising and marketing schemes, which can also mean inadvertently spending money online, for example within apps. Encourage your child to keep their personal information private, learn how to block both pop ups and spam emails, turn off in-app purchasing on devices where possible, and use a family email address when filling in online forms. Make your child aware of scams that may seek to gain access to their accounts, and advise them to be wary in following links or opening attachments in emails that appear to be from organisations such as banks and service providers.

There are real advantages in maintaining an open dialogue with your child about their internet use. Not sure where to begin? These conversation starter suggestions can help.

1 Ask your children to tell you about the sites they like to visit and what they enjoy doing online.

2 Ask them about how they stay safe online. What tips do they have for you, and where did they learn them? What is OK and not OK to share?

3 Ask them if they know where to go for help, where to find the safety advice, privacy settings and how to report or block on the services they use.

4 Encourage them to help someone! Perhaps they can show you how to do something better online or they might have a friend who would benefit from their help and support.

5 Think about how you each use the internet. What more could you do to use the internet together? Are there activities that you could enjoy as a family?

What can I do right now?

- Maintain an open dialogue with your child and encourage them to talk to you about their internet use: for example who they're talking to, services they're using, and any issues they may be experiencing.
- Create a family agreement to establish your children's boundaries, and your expectations, when on the internet. A template agreement can be found at www.childnet.com/have-a-conversation
- Give your child strategies to deal with any online content that they are not comfortable with – such as turning off the screen, telling an adult they trust and using online reporting facilities.
- Consider using filtering software to block unwanted content. In addition to filtering, remember that discussion with your child, and involvement in their internet use, are both effective ways to educate them about the internet.
- Encourage your child to 'think before you post.' Online actions can impact not only yourself but the lives of others. Content posted privately online can be publicly shared by others, and may remain online forever.
- Understand the law. Some online behaviour may break the law, for example when downloading or sharing content with others. Be able to recommend legal services.
- Familiarise yourself with the privacy settings and reporting features available on popular sites, services and apps.
- If your child is being bullied online, save all available evidence and know where to report the incident, for example to the school, service provider, or the police if the law has been broken.
- Familiarise yourself with the age ratings for games and apps which can help to indicate the level and suitability of the content. Also see if online reviews are available from other parents as these may be helpful.
- Set up a family email address that your children can use when signing up to new games and websites online.
- Encourage your child to use nicknames (where possible) instead of their full name online, to protect their personal information, and create strong passwords for every account.

Help make sure that your children know how to stay safe online, by using our SMART Rules for primary aged children, or 6 Tips for Teens.

SMART Rules for primary aged children:

S Safe: Keep your personal information safe. When chatting or posting online don't give away things like your full name, password or home address. Remember personal information can be seen in images and videos you share too.

M Meet: Do not meet up with someone you only know online, even a friend of a friend, as they are still a stranger. If someone you only know online ever asks you to meet up, for personal information or for photos/ videos of you then tell an adult straight away and report them together on www.thinkuknow.co.uk

A Accepting: Think carefully before you click on or open something online (e.g. links, adverts, friend requests, photos) and do not accept something if you are unsure who the person is or what they've sent you.

R Reliable: You cannot trust everything you see online as some things can be out of date, inaccurate or not entirely true. Always compare 3 websites, check in books and talk to someone about what you find online.

T Tell: Tell a trusted adult if something or someone ever makes you feel upset, worried or confused. You could talk to a teacher, parent, carer or a helpline like **Childline 0800 11 11**.

Heart: Remember to always be smart with a heart by being kind and respectful to others online. Make the internet a better place by helping your friends if they are worried or upset by anything that happens online.

6 Tips for Teens:

1 Protect your online reputation: use the tools provided by online services to manage your digital footprints and 'think before you post.' Content posted online can last forever and could be shared publicly by anyone.

2 Know where to find help: understand how to report to service providers and use blocking and deleting tools. If something happens that upsets you online, it's never too late to tell someone.

3 Don't give in to pressure: if you lose your inhibitions you've lost control; once you've pressed send you can't take it back.

4 Respect the law: use reliable services and know how to legally access the music, film and TV you want.

5 Acknowledge your sources: use trustworthy content and remember to give credit when using other people's work/ ideas.

6 Be a critical thinker: not everything or everyone is trustworthy; think carefully about what you see and experience on sites, social media and apps.

Parents

Online safety within the home

1. **Set fair and consistent rules** in relation to your child's internet use at home. As they get older, try to agree the rules with them so that they have some control over their digital world.
2. **Teach your child to think critically** about what they see, read or hear online. For young children encourage them to ask "what would mom or dad say about that"? As they get older they need to be able to assess for themselves whether they are in a risky online place and whether the information they are receiving is reliable and helpful to them.
3. It's much harder for people to empathise with each other when their communications are digital. It's why trolls find it easy to post horrible messages. Helping young people to understand that and pause and think about the impact of things posted online, will help them cope with some difficult behaviour they will come across and avoid getting caught up in it.
4. Maintain a **positive** outlook on your child's use of the internet. Whatever you think of the stuff they watch or the hours they spend on Instagram or Youtube, if you constantly criticise the apps or games they love, they are not going to want to talk to you about their online life. **Remember if something happens online at home don't get mad, get curious.**
5. Young people who can recover from an online mistake can learn and avoid making the same mistake again. You can help by making it easy for them to talk to you about their mishaps. **Try and keep calm and carry on! Think carefully about blocking apps or websites.** This can exacerbate the problem. Making sure they know where to go for help if they need it, and recognising if they are not recovering well so you can step in and help. Don't forget parents can also talk to their child's school about online safety. Also check out Childnet International and their [hot topic](#) section.
6. **Allow young people to explore and take charge of their online life.** Having some control over any given situation is an important part of resilience – and such an important part of digital resilience. It's essential in helping them understand and develop their own sense of what's right and wrong online.

Setting up and implementing the 4 D's at home is vital

- **Digital free zones** – keep technology downstairs
- **Digital role models** – parents lead by example online and with digital usage
- **Digital sunset** – young people need to come away from technology before they go to sleep
- **Digital detox** – As a family try a gadget free day or hour

3 great apps to download:

- **Netware** aimed at parents highlighting different apps and games young people use.
- **Internet Matters (tablet only)** is a fun interactive online safety quiz that can be used at home with children.
- **Youtube for kid's app** aimed at young children

Online Safety Guide for Parents & Carers

Social Media

- Research the age restrictions of apps – don't refer to the information given in app stores as it is not always correct.
- Remind young people to set social media accounts to '**private**' – **apps are set to 'public' by default once downloaded.**
- Do your children understand what is '**safe and unsafe**' to post online?
- Educate young people on **how** they can report their concerns online, and **who** can help.
- Parents ideally need to sit, discuss and walk through social media platforms and instant messenger apps with their children – i.e. you can set up '**family safety mode**' within certain apps.
- Support young people in making safe connections online, and building healthy relationships.
- **Please don't assume all children use the internet and apps the same the same way.** Ask young people regularly where they are going online, and how they are using it.
- **Be careful sharing your location.** Ideally children and young people should have their location services switched off on their phones, or only share their location with selected family and friends only.
- Support children and young people to have a **positive** presence online, and remind them that once something is posted online it stays posted.
- Have a conversation about who your children are following, speaking to and/or engaging with online. Ask how these people make your children feel? E.g. does this person you follow make you feel good or bad about yourself?
- Agree on a realistic time limit as a family, for gadgets and use of social media. Encourage young people to come away from technology an hour before bedtime.

Online Gaming

- Games come with age ratings, or a PEGI rating. Do your research before you download the game. Some games may appear child friendly but still promote violence and/or sexual content.
- Games come with 'chat' features that allow players to communicate with each other. You can chat verbally through a head set, or through an instant messaging function. These chats work similar to most messenger apps, where people can be part of a group or a private conversation. Make sure young people and children are making safe connections online, especially as personal information is often given out accidentally whilst gaming. **If they are being asked to provide personal information, photos or videos, or to meet in the real world, make sure they know to speak to a trusted adult and ask for help. Encourage young people to focus only on the game when talking to other players and avoid other topics. It is also important to just have a conversation with your children about what it is they enjoy about the games they play, and how they can keep themselves safe online.**
- Bullying can be a big concern in the gaming world, and so can online conversations that contain inappropriate themes and language. Make sure children and young people know how to block and report certain people if they are experiencing bullying on a game. Also, just remember it may not always be other young people playing these games, at times your children could be interacting with adults.
- Online games work just like any other company, in that they need to make money. Some games have created their own currency (E.g. V-Bucks in Fortnite), other games encourage users to spend money via a linked bank account/debit card. For a lot of games you can turn off or restrict in app purchases, however some other games (E.g. console games) may require a payment method to be registered before users can access.
- The longer you play games the better you become. May sound obvious but some games can't be paused, as levels need to be completed or the game needs to be played through in its entirety. This can have a huge impact on the behaviour of children and young people, and of course their sleeping patterns. Try and keep technology out of bedrooms, and encourage a good night's sleep by coming away from tech an hour before bedtime, and work with your children set realistic time limits.
