

Robin Class Homework Tasks

Set: Friday 8th July

Due in on Thursday 14th July

Year 2: This week we have been looking at Volume and Capacity in Maths. We have learnt that the capacity of a container is how much it will hold and the volume is actually how much is in there. We have learnt that there are 1000ml (millilitres) = 1l (litre). Robins have been reading increments in 2s, 5s, 20s, 50s, 100s and 500s.

Volume Investigation

Can you find and draw something in the home we could use to measure 5ml of medicine?	Can you find and draw something in the home that has a volume of less than 100ml?
Draw something that is a 1 litre	Draw something that is over 1 litre
How much does a yoghurt pot hold? How much does a carton of milk or juice hold?	Find some other items in the home with ml or litres and draw them.

Please complete some <https://www.topmarks.co.uk/maths-games/daily10> this week on halving and doubling.

Play an ictgame revising capacity and volume and continue with TTRockstars.

Make a list of activities you completed for extra House Points.

Thank you for the continued support! There will be no homework set next week. Enjoy your summer everyone, whatever you have planned. 😊
